*1 The specified foundation sizes represent minimum measurements based on empirical values required to erect a structurally stable, safe and permanent fence line in wind zone 1.

This is based on the assumption that the ground below the top layer is of soil class 3-4 according to DIN 18300 VOB/C and ensures, among other things, a permanent and structurally stable installation.

The foundations do however not correspond to static calculations.

Project-specific static analyses can be issued on request.

*2 require 1 GM(-S) 2030 mm + 1 GM(-S) 1000 mm

*3 require 2 GM(-S) 2030 mm
