

Due to the spread of the COVID-19 pandemic, people around the world are currently forced to live with restrictions. New safety measures are being prescribed by the authorities and have to be integrated into everyday working life. We support you with smart solutions.

PPG Connect

With PPG Connect we bring the Internet of Things (IoT) to you. The intelligent system is quickly installed and connects our quick folding gates, bollards, sliding gates, barriers and other products. Web-based, you control and monitor your systems and manage access authorisation. The installations do not require internet access as they communicate via the mobile phone network. Authorised users who have registered in advance are given contactless access via their mobile phone. If your system should ever malfunction, you will receive an error message via SMS in real time and 24/7. Furthermore, usage statistics help you to plan your maintenance with us according to your needs. In this way you reduce downtimes and save unnecessary maintenance costs.

Advantages

- Contactless operation via mobile phone
- Service planning according to requirements
- Condition monitoring in real time
- Error message by SMS
- Remote diagnosis of the systems
- Management of conditional access
- Quick assembly and easy retrofitting
- Emergency power supply via battery
